

# School Use

The school should require this site to be used by all teachers to ensure the student has all their hours in one place

Get endorsed by school to use (like an insta post or something)

a reminder gets sent out from the school every week to update/check website

**Give out flyers**

Post hours for each class on TVs around campus for quick access

# Access to Website

Create a QR code and post them around campus to access the website

Create an Social Media account with the link to the website

Teachers can post link onto their blackboard/dropbox pages

The teachers should get an email from the school to the link of the website with a tutorial on how to post their hours to ensure they all post their hours

# Hurdles

How are we going to get all the information?

**Teachers could just not use website**

teachers might forget to update their website/not keep it as a priority

If two many kids are on it at once, it may crash

# Website Design

**Weekly Calendar set up, like a schedule**

have a specific color and link to each class calendar to keep organized

**(Website name)**

**Seperate sections for TAs, SIs, and Office Hours**

Broken down into each different subject (ENGL, MATH, etc.) and then broken down into classes and professors

# Information on the Website

Teachers can post updates and dates each week for their class and the student can get a notification if times/dates have changed

Each student can use their student ID to get their own specific classes they have for that semester

Next to each TA's hours could be there best way to contact them (i.e phone number or email)

Search bar where you type in your class and section, then the information comes up
